

# ACCELERATOR ADDITIVE

## CDL-07.004

### Characteristics:

Special additive improving drying time of fillers and clear coats. For the clear coat it can be used only with slow and standard hardener. The drying time will be enhanced by 15%.

### Note:

Not to be used with fast and very fast hardener for clear coat because the drying time will not accelerate, and it may cause defects on the coat, e.g. loss of gloss and adhesion.

**RESTRICTED TO PROFESSIONAL USER**

### Technical data:

Shelf-life: 12 months      Density: 0,9 g/cm<sup>3</sup>      Colour: colourless

### Mixing ratio

#### For filler 4:1:

Filler (A)            100 (vol.)  
Hardener (B)        25 (vol.)  
Accelerator (C) max. 18 (vol.)

#### For filler 5:1:

Filler (A)            100 (vol.)  
Hardener (B)        20 (vol.)  
Accelerator (C) max. 20 (vol.)

#### For clear coat 2:1

Clear (A)            100(vol.)  
Hardener (B)        50 (vol.)  
Accelerator (C)    max. 8 (vol.)
