UNIVERSAL SOFT GREY PUTTY
CSX-01.066

Characteristics:
Multifunctional two-component polyester putty combining the excellent spreadability, compactness and easy to sand. Specially formulated to achieve the highest finish levels on steel, zinc coated and aluminium surfaces as well as polyester laminates. It may be applied in both thin and thick layers.

Application:
The surface must be clean, dry, degreased and matted with abrasives. Thoroughly mix putty by weight with 2% of BPO hardener. Apply within 4-5 minutes at 20°C. Higher temperature can reduce the pot life and accelerates the drying time

Note: Using too much hardener can lead to topcoat discoloration. It is not recommended to use putty below 15°C. Do not apply over wash primers and one component acrylic products.

Technical data:
VOC 2004/42/IIB(b)(250) max. 250g/l
Shelf-life: 12 months   Density: 1.56 – 1.58 g/cm³   Colour: grey

	Cleaning		
	Hardener addition	Putty BPO Hardener	100 g 2 g
	Body filling	4 - 5 min	
	Drying time	20 - 25 min	
	Hand sanding / dry	P120 - P280	
	Machine sanding / dry	P120 - P280	
	Store in cold place
